DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 and 11-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kiyohiko et al. (Japanese Publication 2002-203540)

In regards to claims 1-6 and 11-16, the Kiyohiko et al. reference discloses a nickel oxide containing $\text{LiNi}_{1-z}\text{Mb}_z\text{O}_2$ where z is within the limits of 0.5/0.5 (Paragraph 19) and Mb is manganese and Y is 0. The Kiyohiko et al. also discloses a positive electrode content of Li_2CO_3 in a range of 0.001-0.3 (0.0wt% to 5 wt%; Abstract) where k and n is equal to 0.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7-10 and 17-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kiyohiko et al. (Japanese Publication 2002-203540).

The Kiyohiko et al. reference discloses the positive electrode material of claims 1 and 11 as discuss above and further incorporated herein. It is noted that claims 7-10 and 17-20 are product-by-process claims. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F. 2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). Since, the positive electrode product is identical to that claimed in the claims, the process limitations is not given patentable weight in these claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen O. Chu whose telephone number is (571) 272-5162. The examiner can normally be reached on Monday-Friday 8am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, (Trainer) Susy Tsang Foster can be reached on (571) 272-1293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
